

1937 Monocoupe 90 AW

I am assisting the Personal Representative of the Doug Jackson estate. This historic 90AW will come to market in the not-too-distant future. It is believed that this is the first Warner 145 factory installed on a 90AW. This Monocoupe has been in the dry climate of Longmont, Colorado for the last 45 years. If you are interested in this unique aircraft, please contact:
